In the event of an Availability Service Level Default, the selected bidder shall pay the Company an Availability Service Credit that will be computed in accordance with the following formula:

Monthly Service Level Default = Minimum Service Level – Monthly Actual Service Level

Availability Service Credit = Monthly Service level default * (Summation of Cost References)

The selected bidder shall review with the Company, on a monthly basis from the start of Contract Execution, any entitlement of the Company to an Availability Service Credit.

The total amount of Availability Service Credit that the Bidder is obligated to pay the Company shall be reflected on the invoice provided to the Company in the month after the month in which the Service Levels were assessed. The Company shall be entitled to deduct the Availability Service Credit amount from the amounts payable by the Company to the Bidder as per the invoice.

Example 1

Assume for a particular service level requirement (e.g. Availability of Key Business Infrastructure Elements), the minimum service level is 99.5%

During a Service Assessment period; the service level of 96.5% is achieved:

Total Monthly Payout~Rs. 25 Lacs

The Availability Service Credit due to the Company would be computed as follows:

Q1 Minimum Service Level

Monthly Service Level Default = M1 = 99.95 - 96.5 = 3.45

Availability Service Credit for M1= 3.45% * 25Lacs

= Rs 86,250

8.2. Evaluation Methodology for Eligible Bidder

After qualifying the eligibility criteria, the evaluation will be a three-stage process. The stages are:

- Technical Bid Evaluation
- Commercial Bid Evaluation
- Weighted evaluation

The technical evaluation and the commercial evaluation shall have the weightage of 70% and 30% respectively and this weightage shall be considered for arriving at the successful bidder. The evaluation methodology vis-à-vis the weight-ages are as under:

○ Technical Bid Evaluation

The vendor needs to achieve a cut – off score of 70 marks in this evaluation stage to be qualified for commercial bid opening. Only those vendors who achieve the specified cut – off scores would be short-listed for Commercial Bid Evaluation. Further the vendor must score a minimum of 80% compliance in Technical and Functional Specifications compliance separately. Even if the vendor meets the 70-mark cut-off and does not meet this criterion of 80% compliance, the vendor would have deemed not to be meeting

the RFP Technical requirements. The Technical Proposal will be evaluated for technical this criterion of 80% compliance, the vendor would have deemed not to be meeting the RFP Technical requirements. The Technical Proposal will be evaluated for technical suitability and the criteria for evaluation of technical bids are as under:

#	Proposal Bid Evaluation	Scores
1	Credential strengths	15
2	Techno-Functional features evaluation and Demonstration	60
3	Reference Site Evaluation	10
4	Bidder presentations and Project Plan Timelines	15
Maximum Technical Proposal Bid Evaluation Score		100

The technical evaluation would involve the following major areas:

1. Credential strengths of the Bidder

Each Bidder having credentials as stated in Annexure 02 – Credential strengths will get marks according to their implementation experience.

2 Techno-Functional features evaluation and Demonstration

a. Techno-Functional features evaluation

The Bidder needs to cover the entire functional requirement of Company given in Appendix 01 - Techno Functional Specification. Responses received in Appendix 01 - Techno Functional Specification would be used for evaluating the Bidder on the functionality being proposed by them. The Functional Score for each area in Appendix 01 - Techno Functional Specification would be worked out as follows:

The Bidder is expected to provide a self-score in the “Vendor Scores” column for each requirement requested for, as per the following table:

Bidder input (Vendor Score)	Description	Max. Marks
S	Standard feature. Required features readily available and to be provided	10
C	Customization without any additional cost to the company	5
U	Unavailable. Functionality is not available and will not be provided by the bidder.	0

In ideal scenario, the Company would expect the Bidder to propose the Solution which would have all line items with Bidder score as “S”.

Hence, accordingly aggregated Bidder score will be calculated proportionately. For example, if the bidder self-score 10 (maximum marks) against each line item and assuming there are 100 line items then the aggregated score stands at $100 \times 10 = 1000$

b. Demonstration of the proposed solution

As part of the solution demonstration process

- The bidder will be required to demonstrate the line items present in **Appendix 01 - Techno Functional Specification** - Functional Specifications document to the Company's team. The Company will intimate the bidders well in advance before the product demonstration, if each and every line item or a part of them is to be demonstrated.
- The demonstration to be carried out in Company's premises in Mumbai.
- This will also enable the Company to understand the solution's features and fit with the proposed architecture and identify the level of customization required.
- The Company will communicate a date, time and location to the bidders any time after the last date for submission of proposals.

During the Product Demonstration, Company would be evaluating the Bidder on the functionality of solutions proposed by the Bidder using the **Appendix 01 - Techno Functional Specification** as a base in part or as a whole. Bidder will be evaluated on each of the areas.

Now continuing to the above cited example where marks aggregated for the bidder is 1000 supposing that against 100 line items bidder could only demonstrate 80 line items then his final marks would be $80 \times 10 = 800$ therefore the score for the vendor in this section comes at $(800/1000) \times 60 = 48$. Please note that full marks shall always be constant i.e. $10 \times$ Number of Line items whereas as bidder marks shall vary depending upon their self-score and subsequent demonstration.

3. Reference site Evaluation

Company requires the Bidders to provide at least ONE reference of organization in India where the proposed solution has been implemented. The reference site should be one where the Bidder has implemented the proposed solution and is currently in use as of date of the RFP.

The evaluation of reference site visit shall be based on level of satisfaction of operation & management teams of the reference organization and observations of our designated officials towards live view of the frontend of the software installed at reference site. The scale of evaluation is as under:

SNO	Evaluation Parameter	Scale of Score
1	Level of satisfaction of Technology & management teams of the reference organization	0-5
2	Observations of Company designated officials towards Project overview, Implementation methodology and adherence to project timelines of reference Project	0-5
	Maximum Score	10

4. Bidder presentation

The Company will require the Bidders to make presentations regarding the various aspects of the proposed solutions. This process will also enable the Company to clarify issues that may be identified from the Bidders' responses to the RFP. The Evaluation Committee decided by the Company would be scoring the presentation made by the Bidders at Company's premises based on a structured questionnaire broadly across the following:

#	Evaluation of the Bidder Presentation
1	Product Capability
2	Workflow Architecture and Design – Key Features and Functionalities
3	Operational Ease (Low code platform)
4	Adherence to Project Timelines
5	Execution Competency (Functional & Technical Competency)

○ Commercial Bid Evaluation

The vendor who achieves the required cut – off technical score as part of technical evaluation shall be qualified for commercial bid opening. The commercial bid would be evaluated based on a "Total Cost of Ownership" ('TCO') basis. The key considerations of the TCO would be the total payouts for entire project through the contract period of 5 years.

Total Cost of Ownership (TCO) Calculation Methodology

The company shall include these items while calculating TCO under licensing model:

1. The bidders need to quote indicative price of Hardware, system software, Database license etc in their commercial bids as per Appendix 02 – Bill of Materials (A) for Licensing Model. However supply of hardware and Database license do not form part of the scope of this RFP. Even though this item is only for calculation of TCO, the company reserves the right to compare this price from open market and change/adjust this indicative item at market price.
2. The company shall consider an indicative amount towards cost of Infrastructure and in-house manpower and facility management, this amount shall be kept same across all shortlisted bids

After arriving at TCO for licensing and processing model for each shortlisted bidder the lower TCO out of the two (Licensing and Processing) for each shortlisted bidders shall be taken to the below mentioned Techno commercial evaluation process.

○ Weighted Evaluation:

On the basis of the combined weighted score for technical and commercial evaluation, the bidders shall be ranked in terms of the total score obtained. The proposal obtaining the highest total combined score in evaluation of quality and cost will be ranked as H-1 followed by the proposals securing lesser marks as H-2, H-3 etc. The proposal securing **the highest combined marks and ranked H-1 shall be recommended for award of contract.**

As an example, the following procedure can be followed:

A score (S) will be calculated for all qualified bidders using the following formula:

$$\text{Clow/C X100 + T (1-X)}$$

C stands for discounted rate arrived basis of commercial evaluation;
Clow stands for the lowest rate arrived basis of commercial evaluation.
T stands for technical evaluation score and
X is equal to 0.30.

#	Bidder	Technical Evaluation Marks (T)	Discounted Rate (C)	T * 0.70 (A)	$[(C_{low} / C) \times 100] \times 0.30$ (B)	Score (S = A + B)
1	AAA	75	120	52.5	25	77.5
2	BBB	80	100	56	30	86
3	CCC	90	110	63	27.3	90.3

In the above example, Clow is 100.

In the above example, CCC, with the highest score becomes the successful bidder (**H1**).

In case of more than one vendor with equal highest score (S) up to three decimals, then number of decimals will be increased.

The Company may in its absolute discretion engage in discussion or negotiation with H1 bidder. The decision of the Company shall be final and binding on all the vendors to this document. The Company reserves the right to accept or reject an offer without assigning any reason whatsoever.

9.0. Payment Terms

The bidder must accept the payment terms proposed by the Company. The commercial bid submitted by the bidder must be in conformity with the payment terms proposed by the Company. Any deviation from the proposed payment terms would not be accepted. The Company will not pay the Bidder any additional charges at a later date for all such customizations.
- The selected bidder shall take up all such functionality as required by the Company on a priority basis even though the Bidder is supposed to provide for the same at a later date as per its response in Appendix 01 - Techno Functional Specification and till such time the functionality is not provided for the selected bidder will suggest a suitable workaround for the same. The Company will not pay the selected bidder any additional charges for such customization requests.
- All additional customization over and above the RFP requirements as per the man day rates quoted in the RFP would be paid to the selected bidder on the completion of respective customization user acceptance and go live along with Company signoff including 30 days of successful working of the customization delivered in the live environment.

It should be distinctly understood by the selected bidder that providing workarounds should not be treated as customization completed.

There shall be no escalation in the prices once the prices are fixed and agreed to by the Company and the selected bidder. Payment will be released by the Company as per above payment terms on submission of relevant documents.
